

CAPABILITY STATEMENT 2022

SPECIALIST ENGINEERING, MANUFACTURING & CONSTRUCTION SERVICES

COMPANY OVERVIEW

Createch Industries sets the benchmark in quality and delivery with specialist expertise and an integrated approach to project execution across the engineering consulting, manufacturing, and construction service streams.

With an on-premises project team comprising engineers, designers, supervisors, and inspectors, Createch seamlessly harness a broad range of capabilities, enabling end-to-end project delivery that exceed our Clients expectations.

Providing high quality structural and piping design, fabrication, and construction execution, Createch's reputation for superior quality, exceptional service and delivery has grown rapidly, with many successful projects delivered within the oil and gas, energy, mining, infrastructure, and heavy industrial sectors.

Createch's industry-leading expertise in crane and lifting systems further provides value to its global client base, specifically within the petrochemical tank storage sub-sector.

Createch achieve consistently successful results for it's Clients, delivered by a non-negotiable commitment to safety, quality and delivery.

Createch's highly skilled team is driven by the challenge of embracing tough projects.

With a reputation for precision and reliability, we find optimal solutions across engineering, manufacturing and construction needs.

OUR PURPOSE

Regardless of the challenge, Createch does not compromise on quality or delivery. We are committed to exceeding expectations, evidenced by our strong relationships with long-term clients.

Our focus on quality permeates every aspect of our business, ensuring that our clients receive superior products and services that exceed their expectations. We understand that safety and quality are not just goals; they are a mindset that shapes everything we do.

Createch people are invested in the success of every project they undertake.

Commitment, passion, integrity, inclusion and diversity ensure a healthy business culture in which we value and develop staff, and support Indigenous participation, and procurement.

*We acknowledge

of the land where
we are based.*

OUR SERVICES

Createch combines its expertise in engineering consulting, manufacturing and construction to deliver a full service package to Clients.

Createch people have comprehensive understanding and capabilities in front end design, capital works projects, maintenance upgrades and modifications, process and operational improvement.

Core to Createch's success is the integrated approach of engaging with all relevant service streams to ensure exceptional project performance for the Client.

Createch's delivery team is self sufficient, knowledgeable, and trust their systems.

Australian owned and operated, Createch's manufacturing facility is located in New South Wales comprising: structural steel fabrication, piping and pressure vessel fabrication, blasting and coatings, and weld inspection and testing.

Createch's construction teams service projects nationally across its broad client base.

Createch people set the standard for service and quality throughout all stages of project delivery.

At Createch, we aim to be the best, rather than the biggest, driven by a diverse yet integrated skillset, can-do attitude and consistently successful outcomes.

ENGINEERING AND CONSULTING

Createch provide fully compliant design engineering and related engineering services. Our people are proficient in a wide range of specialist design software packages from 3D modeling and engineering drafting, to specialist finite element analysis for pressure vessels, piping, structures and concrete. The consulting service stream supports the engineering delivery of our civil and heavy steel structures, mechanical equipment, process instrumentation, electrical and control systems.

MANUFACTURING

We fabricate, blast and coat, assemble and test high quality equipment. Ranging from medium and heavy structural steel (mechanical, process equipment support structures), to process piping, pressure vessels, furnace components, air handling ducting, and electrical and controls systems. Our manufacturing is carried out under stringent quality control and compliance standards per relevant ISO and AS/NZS standards pertaining to use of structures and end user requirements.

CONSTRUCTION

We offer a full construction service to compliment the manufacturing service streams. We provide all plant and equipment, supervision, tradespeople and ensure seamless project execution.

INDUSTRIES WE SERVE

We design, manufacture, construct and maintain equipment and structures for sectors including oil, gas and energy, mining, civil construction and petrochemical storage. We design, manufacture and install large scale structural steel, piping and mechanical equipment complete with certification and compliant quality documentation.

- ✓ Oil and Gas
- ✓ Energy
- ✓ Mining
- ✓ Refineries
- ✓ Petrochemical
- ✓ Chemical Manufacturing
- ✓ Civil Construction
- ✓ Waste Management
- ✓ Heavy Industrial
- ✓ Materials Handling

Our mining, resources and material-handling solutions for large corporations include specialised lifting equipment, support structures, conveyor systems, drives, chutes and transfers, through to diverter gates, guillotines and reclaimer packages.

ACCREDITATION AND EXPERTISE

Createch's friendly, professional team of engineers, supervisors, project managers and tradespeople are specialists in their fields. Collectively, they create an industry force, designing and delivering quality products and services across an extensive range of projects.

Our combined experience in engineering, operational and asset management, manufacturing procurement and construction are complemented by compliance and regulatory knowledge enabling assured compliance and quality project outcomes for our clients.

Our ability to provide an integrated team of experts, with direct manufacturing, installation and commissioning, all within the one business, ensures a streamlined project delivery for clients.

- ✓ Sustainable Certification: ISO 45001, 9001, 14001
- ✓ Highly skilled, diverse and integrated team
- ✓ Chartered engineers, project managers, supervisors
- ✓ Specialist manufacturing capability fabrication
- ✓ Specialist custom lifting equipment and crane design supply and install
- ✓ Asset management and procurement

OUR CLIENTS

We proudly build partnerships across a wide range of sectors both nationally and internationally, enabling clients of any scale to achieve optimal operational goals. Reliability, efficiency and quality are hallmarks of our work.

We have delivered countless projects comprising of consulting, detailed design, manufacturing, execution and commissioning packages for our clients *BHP*, *BlueScope*, *Cleanaway*, *Aerison*, *National Australian Pipelines*, *Dialog* and *Saunders International*.

With our integrated skillset embracing design fabrication, manufacturing, construction, commissioning and all other engineering requirements for large-scale construction and infrastructure projects, we have the capacity and commitment to continue to set new benchmarks for quality and delivery in the industry.
